+ TIMELINE

VuSpex, Inc — Remote in Santa Cruz, CA
Lead Web Developer **2022-2024**
Lead a global team of developers in continuing work on the company's flagship web application product. Designed and built a new DevOps framework and CI/CD pipeline. Gave product demonstrations to prospective customers both in-person and remotely.

Spiceworks Ziff Davis — Remote in Austin, TX
Lead Web Developer **2020-2022**
Built world-class marketing sites for high profile clients including HP, CyberPower, and Intel. Met with clients and other stakeholders to acquire requirements and provide creative direction. Built fully responsive sites from Adobe xD design mockups. Integrated with Google Analytics and Salesforce to track click-through and conversion rates.

Warwick Broadband — Hybrid in Warwick, MA
Software Architect / Web Engineer **2016-2020**
Responsible for the design, engineering, and buildout of a suite of wireless broadband monitoring software. Created a lightweight, fast, and flexible database schema to provide real-time and historical access to constantly changing data. Made heavy use of Linux server tools, PHP, and SNMP to acquire and aggregate data.

CISAbroad — Hybrid in Northampton, MA
Lead Web Developer / Linux System Admin **2013-2016**
Responsible for the development, maintenance, and server configuration of the company's suite of direct marketing sites. Worked with stakeholders to gather requirements, receive feedback, and drive engagement. Developed custom Wordpress plugins to integrate with Salesforce, Facebook, and Google Analytics.

Hachette Publishing — Onsite in New York, NY
Web Developer **2008-2011**
Built and maintained digital publishing platforms based on Wordpress for Elle Magazine and Car and Driver. Worked with publishing staff to turn design mockups into feature-rich applications. Migrated existing content from legacy systems.
